

Boyerne Block Paving Range

Boyerne Block Paving Range

An increasingly popular choice with domestic and professional customers alike, our Boyerne range is a break from the norm. An embossed surface and slightly wider joints make for a unique look that is ideal for creating a period feel in gardens and driveways or in rejuvenation and restoration projects. Boyerne paving blocks can be used as part of our permeable paving solution.

Hard Landscaping

Boyne Block Paving Range

Technical & Product Data

At SDS Hard Landscaping we produce our full range of paving and landscape products in partnership with Kilsaran, within their state-of-the-art computerised manufacturing facility.

We are committed to ensuring that our entire product range meets and exceeds all National and European Standard Requirements.

SDS operate Quality Control procedures throughout the process and all of our paving block range is subjected to full testing in accordance with BS EN 1338:2003 using the latest technology in our purpose-built Paving Products Laboratories.

Product & Depth	Dimensions (mm) L x W	Pieces Per M ²
Boyne 60mm	157mm x 132mm	48
Boyne 60mm	192mm x 132mm	40

Colours Available: Natural, Raven and Rustic.

Other colours may be available by special order.

Technical & Performance Data

Manufacturer	SDS in partnership with Kilsaran
Manufacturing Standard	BS EN 1338:2003
Manufacturing Method	Hydraulically pressed semi-dry concrete
Constituents	Aggregates, sand, admixtures, cement, colour pigments
Packaging	Baled, strapped and plastic wrapped
Strength	Typical Splitting strength of $\geq 3,6$ MPa and a failure load of ≥ 250 N/mm

Structural Design Structural design of pavements incorporating concrete block paving should be carried out in accordance with BS 7533 Part 1 or 2 as appropriate and it may also be useful to read this in conjunction with the Interpave guidance manual '*Structural Design of Concrete Block Pavements*' available from www.interpave.org

Blending When selecting paving blocks from packs during laying, select alternative pieces from at least three different packs where possible to minimise colour variation on the finished pavement.

Further Guidance Further guidance on installation and specifications of concrete block pavements is available from Interpave on their website www.interpave.org

Disclaimer:

All figures given are approximate only. The above data serves as a guideline only. SDS does not accept responsibility for the design and construction of concrete block pavements by third parties. As concrete block paving is made from naturally occurring aggregates some slight and normal colour variation may occur. Efflorescence may occur as a naturally occurring phenomenon when temporary white stains may appear on the block surface. SDS cannot accept responsibility for these natural occurrences. Through the use of the most modern photographic techniques available we endeavor to ensure that the colour illustrations of our products in this data sheet are as accurate as possible. We do recommend that any final decision is based upon viewing a sample of the product.

Boyne: Natural

Boyne: Raven

Boyne: Rustic
